25X1

1.

25X1

25X1

the BBC program transmitted at 2100 hours on the 25 and 49 meter band was very effectively jammed. The same program, however, when transmitted on the 31 and 41 meter band was less effectively jammed. Of all foreign broadcasts, the BBC commanded the greatest respect because of its "reliability of news."

25X1

2. The Voice of America could best be heard in Rumania at 2200 hours on the 36.9 meter band. When transmission was via the 41 meter band, it could be heard, although there was annoying interference from jamming. The Voice of America was resented by some Rumanians because the "tone" of the broadcasts led them to believe some "activity" would follow the broadcasts.

25X1

3. Radio Free Europe signal was very weak.

4. Radio Paris, on the 31 meter band, was usually heard at 2000 hours; recently, however, this station was very effectively jammed.

5. Usually, any news received from a foreign broadcast circulates throughout the city with "lightning speed."
